

## **Key Updates: Radiation Oncology Guidelines v2.0.2024 (Effective October 1, 2024)**

Please note that this is not a comprehensive list of updates, but rather are some of the more clinically impactful updates. For complete guideline updates, please refer to the diagnosis specific guideline.

### **I. Biology-Guided Radiation Therapy (BgRT)**

A. This is a new guideline for a new modality of treatment. It is considered investigational for all indications.

### **II. Cervical Cancer**

A. Removed exceptions required to approve IMRT.

### **III. Prostate Cancer**

A. Added option of 36 Gy in 6 fractions for treatment of low-volume metastatic disease and removed statement requiring contraindication to NCCN® category 1 systemic regimens.
